

**Kathy Beydler, RN, MBA, Certified Perioperative Nurse**  
CASC-Certified Administrator Surgery Center

After more than thirty years in healthcare and more than twenty of those in leadership, she has learned that the tools we need to be successful are found in what is really uncommon sense. The biggest change to her career was when she became a patient after an elective surgery went wrong. After 6 months of recuperation during which she experienced sepsis, a wound vac, physical therapy, home health, 4 surgeries (2 of them emergent) and 2 non-emergent surgeries, Kathy has come out on the other side with a renewed passion for patient care and the care of their families. In her presentations, she shares how these experiences have impacted patient care and how you can deliver excellent patient care through the eyes of your patients and their families.
